

MONTANANS AGAINST COMMON CORE

Do you know who controls your child's education?

Take Action—Join our informational TeleConference

Tuesday, March 11th at 7:00 PM, MDT

Concerned Citizens are invited to join an exclusive **90-minute discussion** via telephone that will address psychological impacts of Common Core.

Hear from two National speakers—Mary Calamia, a Licensed Clinical Social Worker in New York State, and Sinhue Noriega, teacher and author, who infiltrated the system behind the computer adaptive software used for the Common Core assessments. Hear why you should opt your children out of the Smarter Balanced Assessments and other computer based surveys.

The experts will present valuable information about Common Core, and share their concerns and solutions. The final 30 minutes are reserved for your questions.

The minds and futures of our children merit your careful consideration of ALL the facts in search of TRUTH and the best course of action.

Call in Number: 530-881-1300
Code: 587258

QUESTIONS may be submitted in advance or during the call by emailing them to:
info@MontanansAgainstCommonCore.com

We look forward to having you on the call! MontanansAgainstCommonCore.com

About our panel:

Mary Calamia has been "in the trenches" working against Common Core for well over a year. She is a Licensed Clinical Social Worker in New York State and manages a private psychotherapy practice where she works with children, teens, and adults representing more than 20 school districts on Long Island. She partners with her yellow Labrador retriever, Jack, who works with the children and helps them to heal the hurt inside.

Sinhue Noriega, teacher and author, has been infiltrating the secrets behind the Common Core and discovered unique insights as a researcher from the inside. For the past seven years he has taught in many parts of the southwestern states, and gained invaluable information pertaining to the nature, intent, and future of the Common Core. More so, he has exclusive information that makes clear the hidden agendas and exposed the weakness that will enable us to repeal the Common Core. He taught in a Beta testing system inside a correctional facility on California that began the initial testing of the adaptive computer software developed for Common Core. His contacts in both administration and teaching have facilitated a great deal of research inside the educational system giving him insights into the intricacies in that system.

He continues to educate the public and is in constant contact with officials and representatives in his efforts to repeal the Common Core. Sinhue exposes the link between Common Core, Obamacare, and links vital information given to him by third parties that prove the unconstitutional nature and purpose of the Common Core. In his travels as an author, he speaks to audiences educating them on the overextending policies of government like the Common Core.
